## Population Exposure

population per 1 sq. km from Landscan

# 5000 10000 76.8°W Chincha Alta Chuschi 13.6°S 14.8°S Nazca Mina; de Marcona Yauca 15.9°S

#### PAGER content is automatically generated, and only considers losses due to structural damage. Limitations of input data, shaking estimates, and loss models may add uncertainty. https://earthquake.usgs.gov/earthquakes/eventpage/us7000c6p3#pager

### **Structures**

Overall, the population in this region resides in structures that are highly vulnerable to earthquake shaking, though some resistant structures exist. The predominant vulnerable building types are mud wall and reinforced/confined masonry construction.

### **Historical Earthquakes**

| Date       | Dist. | Mag. | Max        | Shaking |
|------------|-------|------|------------|---------|
| (UTC)      | (km)  |      | MMI(#)     | Deaths  |
| 2001-12-04 | 356   | 5.8  | VI(32k)    | 2       |
| 1981-04-18 | 249   | 5.5  | VI(193k)   | 8       |
| 2007-08-15 | 197   | 8.0  | VIII(493k) | 514     |

Recent earthquakes in this area have caused secondary hazards such as landslides that might have contributed to losses.
